

Our Vision

Provide a safe and positive environment where creativity is encouraged, differences are celebrated and respect is valued.

Through a collaborative approach to learning, we will maintain high academic standards, social acceptance and student expectations for excellence, so they can contribute positively to a bilingual, multi-cultural community.

Respond to the needs of all learners, taking into account the diversity of students' needs and abilities. Adopt a flexible and open approach that respects these differences, and fosters learning, as well as a sense of dignity and success for all.

Build a partnership with parents in fostering their children's education through open and honest communication working with them as partners in the school's educational project.

Recognize that students achieve academic excellence through innovative and creative teaching practices and encourage students to Connect, Collaborate and Curate in a 21st Century Learning Context.

Protect and value a child's worth and dignity above all else.

Parent Involvement

Parent involvement in the life of our school is a core component of our success as a school community. There is an active and dedicated Home & School Parent Committee dedicated to the spirit, fun and well being of our students. Parent volunteers are always welcome to help out in many different school functions. Such as working in classrooms, the library, baking for bake sales and so much more.
