

Ashley Zwirek

Engineer and Project management professional

Some of my fondest Lindsay Place memories were in my science classes with teachers like Ms. Slatery, Ms. Ashraf, and Mme Falemange. I remember starting a project called Oceans 10 to bring the ocean to the classroom. We taught students about the ocean and the differences in freshwater fish and saltwater fish. We even had events with the local elementary school.

Of course, I can't forget my music classes with the amazing Mr. Doxas and Mr. Hodgeson. They fed my love of music and helped develop my love of music love of music and performance in the orchestra and the jazz band.

I also won an opportunity to go to Hunstville, Alabama to attend the International Space Camp where we met students from all over the world and learned everything we could about space missions, rocketry, astrophysics and more.

I have been working at Bombardier for 8 years as a mechanical engineer with a specialization in aerospace & propulsion and as a project management professional, and I know that my years at Lindsay Place helped me reach my career goals.
